Crown has pioneered the way for Cryogenic Hollowing tools. The Midi Revolution Hollowing tool is the perfect tool for those who wish to turn hollow forms and semi-enclosed vessels. The articulated head design allows you to adjust the cutting tip position for optimum control and reach into those undercut shoulders on your work. It can also be used easily on open-faced work.

The Midi Revolution comes with a Super Ring cutter designed for end grain turning and a 'Bullet-Shaped Scraper' for both end and cross grain turning. Its unique micro-adjustable shield enables the user to make controlled large bulk removal cuts as well as small refining cuts. The Scraper cutter is a great finishing tool.

There are many tips and optional extras available for the Revolution Hollowing Tool range. All the tips are cryogenically treated to provide superior wear resistance. Honing the cutters with a diamond maintains peak performance.

The Revolution range is also available in two Full Size Systems (13mm and 16mm) with solid brass fixings and an adjustable ergonomic handle giving the user the ultimate in comfort and stability. The Miniature 13mm version, which is perfect for smaller projects, comes with a 216mm black ash handle.

The Midi Revolution has a 16mm diameter x 220mm long shaft, and the total length inclusive of handle and cutter is 590mm. It is designed to hollow to a depth of approximately 180mm.

Crown's Midi Revolution hollowing tools have a suggested selling price (SSP) of £67 each.
