"This is by far the best powered head unit I've used. Its compact design means it's extremely light and unrestricted for the wearer, and the added protection of the bump cap means you have a real sense of security. My best purchase this year!"

Comfortable, efficient and made in the UK

The new APF10 Evolution respirator from Axminster is not just evolutionary in name. The balance of the unit is excellent with the motor and filters mounted on the peak of the bump cap and the battery at the rear. Combined with the low overall weight, it is very comfortable.

The motor unit blows filtered air down over the face at a rate of 160L/min, and breathing is normal and relaxed. The air exiting around the sides and bottom of the mask is at a slightly higher pressure than that outside, thereby forming a most effective seal. Beards are not a problem, and if you wear glasses, these will not mist up as you breathe out. The Li-Ion batteries give a runtime of 8 hours on a full charge. The filters are easy to inspect and replace and the bump cap's outer cover is removable for washing.

The unit provides FFP2 respiratory protection to EN12941:1988 TH1P. The bump cap gives head protection to EN812. The clear visor gives you a wide field of vision along with impact protection to EN.166.B.1.

The respirator is supplied with an 8-hour battery, charger, two filters, a flow-rate meter and complete instructions all within a strong storage box.

Evolution® is a registered trade mark of JSP Ltd, used under licence by Axminster Tool Centre Ltd.
