# Community news

We bring you the latest news from the world of woodturning and important dates for your diary

## AAW: See the Moulthrops

The American Association of Woodturners (AAW) 30th annual international symposium will be held in Atlanta, Georgia, 9–12 June, 2016. In conjunction with the event, Philip and Matt Moulthrop will present a special lecture, open to registered AAW symposium attendees on Thursday 9 June at 7pm, entitled, 'Material Selection and Creation of Turned Objects Using Personalised Tools and Methods'. Attendees will learn about the Moulthrops' specialised turning techniques, their turning tools and how they select wood for projects. The AAW symposium offers something for woodturners of all skill levels.

Attendees may select from a broad range of demonstrations and panel discussions to focus on sessions that will enhance their woodturning experience the most.

**When:** 9–12 June, 2016

### A THREE-GENERATION FAMILY AFFAIR

Atlanta, Georgia is home to one of the most notable woodturning families in the world: the Moulthrop name has been synonymous with woodturning for more than 50 years. Ed Moulthrop, often referred to as the 'father of modern woodturning', was an innovator and pioneer in the field of woodturning, developing his own technique for curing wood with polyethylene glycol (PEG). He also learned blacksmithing so he could hand forge his own turning tools, then designed and built his own lathes to accommodate huge logs.

Ed's son, Philip Moulthrop, turned part-time in his father's shop. There he learned the process of using PEG and how to hand-forge his own tools. In 1977, Philip started turning professionally. Working with spherical and elliptical shapes that had been his father's trademark, Philip started developing his own forms. His most recent work involves the use of smaller log sections to create mosaic bowls.

Philip's son, Matt Moulthrop, has spent his life surrounded by wood, turning his first bowl at the age of 7. After completing a Bachelor of Arts degree at the University of Georgia and Master of Business Administration degree at Georgia Tech, Matt spent time in the corporate world before ultimately determining he was most content in the 'shop.

The Moulthrops' work is included in the public collections of the Smithsonian Institution, Renwick Gallery in Washington, D.C.; The White House Collection of American Crafts, Clinton Presidential Library in Little Rock, AR; Los Angeles County Museum of Art; Mint Museum of Craft and Design in Charlotte, NC; Yale University Art Gallery; Arizona State University Art Museum and Carnegie Museum of Art in Pittsburgh, PA.
